Arsenii Ashukha

PhD Candidate at Bayesian Methods Research Group
Student Researcher Samsung AI Center Moscow
Home page Google Scholar

EDUCATION

- PhD in Computer Science, ***National Research University Higher School of Economics***, 2017 - 2021
  Topic: Applications and understanding of variational inference for modern deep learning, Advisor: Dmitry Vetrov
- MSc in Computer Science, **Moscow Institute of Physics and Technology**, 2017 (with distinction)
  Thesis: *Sparsification of DNNs probabilistic framework*, Advisors: Dmitry Vetrov and Alexey Dral
- BSc in Computer Science, **Bauman Moscow State Technical University**, 2015
  Thesis: Bigram anchor words topic modeling, Advisor: Natalia Loukachevitch

PROFESSIONAL EXPERIENCE

- Research scientist at ***Samsung AI Center Moscow*** (2018 - Now):
  Research on probabilistic deep learning, ensembles of DNNs, uncertainty estimation.
- Research scientist at ***Yandex Research*** & ***University of Amsterdam*** (2017 - 2018):
  Research on Bayesian deep learning for a group-level sparsification and uncertainty estimation.
- Research Intern at ***Lab of Deep Learning and Bayesian Methods HSE*** (2016 - 2017):
  Research on Bayesian deep learning for sparsification and incremental learning.

My responsibility included: selecting research directions, scheduling and executing research agenda, development of machine learning models and algorithms, writing papers.

Before I dive into research, I worked as a machine learning engineer at Rambler and Yandex, where I worked on a variety of industrial problems that required creating machine learning models and processing a massive amount of data. Such problems include recommendation systems, advertising systems, and music processing.

PUBLICATIONS

- **Arsenii Ashukha***, Alexander Lyzhov*, Dmitry Molchanov*, Dmitry Vetrov
  Pitfalls of In-Domain Uncertainty Estimation and Ensembling in Deep Learning, ICLR (2020).

MISCELLANEOUS

- **Reviewing:**
  - Conferences: ICML (2019, 2020), NeurIPS 2019 (top-50% highest-scoring reviewers), ICLR 2020
  - Workshops: INNF (2019, invertibleworkshop.github.io), BDL (since 2017, bayesiandeeplearning.org)
- **Thesis (co-)supervision**:
  - Alexander Lyzhov
    - Deep Neural Network Ensembles: Analysis and Approaches to Diversification (MSc, 2020)
  - Andrei Atanov
    - Effective Learning of Deep Neural Networks Ensembles (BSc, 2018)
    - Learning Deep Models with Small Data (MSc, 2020)
  - Evgenii Nikishin (MSc, 2019)
    - Stability Improvement and Knowledge Transfer in Deep Reinforcement Learning (MSc, 2019)
- **Teaching:**
  - Supervisor of scientific seminars on machine learning at HSE and Yandex (since 2017)
  - TA at **Deep|Bayes** Summer School on Bayesian Deep Learning (since 2017), http://deepbayes.ru
  - Machine Learning at MIPT: TA (2016), Lecturer and manager (2017, 2018)

- **Open-source contributions**: See https://github.com/senya-ashukha.

- **Languages and Keywords:** I'm fluent with Python which is my love, I use to code on C, Go, language is not a problem after all. I'm also fluent with common libs such as NumPy, Matplotlib, scikit-learn, etc. My primary deep learning framework at the moment is PyTorch which is my absolute love, prior to that I had a decent experience with Theano+Lagange and TensorFlow.

- **Foundations are crucial:** While I was MSc student I learned many fundamentals of machine learning and algorithms at Yandex School of Data Analysis (YSDA) e.g., Machine Learning, Bayesian Machine Learning, Optimization in Machine Learning, Deep Learning, and Graphical Models.
