I'm a Research Scientist at Samsung AI Center Moscow. I (almost) received a PhD in Bayesian deep learning [@bayesgroup](#) so I can make big overcomplicated DNNs work :) My research interests are focused on crafting and training reliable and data&compute-efficient deep neural networks.

Prior to that, I was a part of Yandex Research team (a Russian search giant) and did ML engineering internships at Yandex and Rambler, where I worked on deep learning for audio and recommended systems. I received a master's degree in machine learning at MIPT and Yandex school of data analysis. I did a bachelor's degree at BMSTU with a major in applied math and computer science.

SELECTED PUBLICATIONS

Most representative works are highlighted

- ***Pitfalls of In-Domain Uncertainty Estimation and Ensembling in Deep Learning***, ICLR 2020 [[arXiv](#)]
[Arsenii Ashukha](#), Alexander Lyzhov, Dmitry Molchanov, Dmitry Vetrov
- ***Variational Dropout Sparsifies Deep Neural Networks***, ICML 2017 [[arXiv](#)]
Dmitry Molchanov, [Arsenii Ashukha](#), Dmitry Vetrov
- ***Greedy Policy Search: A Simple Baseline for Learnable Test-Time Augmentation***, UAI 2020 [[arXiv](#)]
Dmitry Molchanov, Alexander Lyzhov, Yuliya Molchanova, [Arsenii Ashukha](#), Dmitry Vetrov
- ***The Deep Weight Prior***, ICLR 2019 [[arXiv](#)]
Andrei Atanov, [Arsenii Ashukha](#), Kirill Struminsky, Dmitry Vetrov, Max Welling
- ***Variance Networks: When Expectation Does Not Meet Your Expectations***, ICLR 2019 [[arXiv](#)]
Kirill Neklyudov, Dmitry Molchanov, [Arsenii Ashukha](#), Dmitry Vetrov
- ***Uncertainty Estimation via Stochastic Batch Normalization***, ICLR Workshop 2018 [[arXiv](#)]
Andrei Atanov, [Arsenii Ashukha](#), Dmitry Molchanov, Kirill Neklyudov, Dmitry Vetrov
- ***Structured Bayesian Pruning via Log-Normal Multiplicative Noise***, NeurIPS 2017 [[arXiv](#)]
Kirill Neklyudov, Dmitry Molchanov, [Arsenii Ashukha](#), Dmitry Vetrov

CODE

- Check out very short and simple and fun to make implementations of ML algorithms:
 - [Gradient Boosting](#)
 - [Real NVP normalizing flows](#)
 - [Quantile Regression DQN \(Distributional RL\)](#)
- Also, check out more solid implementations:
 - [Multi-GPU SimCLRv1](#) closely reproduced results on both CIFAR-10 and ImageNet
 - [Ensembles \(Deep ensembles, Snapshot ensembles, cSGLD, FGE, etc.\)](#)

EDUCATION

- 2017-2021 PhD in Computer Science, **Centre of Deep Learning National Research University HSE**. My PhD is focused on *applications and understanding of stochastic deep learning models*, Advisor: [Dmitry Vetrov](#).
- 2015-2017 MSc in Computer Science, **Moscow Institute of Physics and Technology** jointly with **Yandex School of Data Analysis**, where I worked with [Dmitry Vetrov](#) on learning sparse DNNs.
- 2011-2015 BSc in Computer Science **Bauman Moscow State Technical University** with a double major in applied math and CS. I worked on linguistically motivated topic models with [Natalia Loukachevitch](#).

PROFESSIONAL EXPERIENCE

- *Research Scientist, Samsung AI Center* (2018 - Now):

Showed that modern uncertainty estimation techniques perform worse than the simplest 5 year old baseline, and widely used metrics for asses uncertainty estimation cannot provide a fair ranking of methods (results published at ICLR'20).

The other topics I worked/working on include learnable data augmentation, learning prior distribution over DNNs' kernels with generative models, and self/semi-supervised learning. Since 2021 I'm helping to manage the lab.

- *Research Scientist, Yandex.Research & Centre of DL and Bayesian Methods NRU HSE* (2016 - 2018):
Created Sparse Variational Dropout a method for sparsification of DNNs that, for the first time, allowed to achieve over 250x compression ratio (results published at ICML'17). The modified version of SparseVD with neuron-level sparsity allowed to accelerate inference of a CNN by 2-5 times and was applied to the feature extraction process for image retrieval (results published at NeurIPS).
- *Machine Learning Engineer Intern, Yandex.Music* (summer of 2016):
I worked on feature extraction techniques for music data with convolutional neural networks. I also developed an evaluation of learned representations. The representations were used in the content-based recommendation system for yandex music.
- *Machine Learning Engineer Intern, Rambler&Co* (May - Oct 2015):
Worked on demographic classification and recommendation systems. My responsibility included improving the quality and performance of classifiers, automatic feature extraction algorithms, and recommendation algorithms. Stack of technologies: Hadoop, Hive, Spark, XGboost, VW, gensim.

REVIEWING

- Conferences:
 - International Conference on Machine Learning, ICML (2019, 2020 top-33% highest-scored reviewers)
 - Neural Information Processing Systems, NeurIPS 2019 (top-50% highest-scored reviewers)
 - International Conference on Learning Representations, ICLR (2020, 2021)
- Workshops:
 - ICML Workshop on Invertible Neural Networks (2019, invertibleworkshop.github.io)

TEACHING

- Supervisor of reading clubs on machine learning at HSE and Yandex school of data analysis (since 2017)
- Talks and practical sessions at **Deep | Bayes** Summer School on Bayesian Deep Learning (since 2017)
- Lecturer, Moscow Institute of Physics and Technology: I was a lecturer and manager of the deep learning brunch of a faculty-wide machine learning course ~60 students ([ml-mipt.github.io](https://github.com/ml-mipt)). Also, I taught deep learning and practical sessions on cutting-edge ML algorithms on a facultative course "Data Mining in Action" ~ 200 students (<https://bit.ly/3eRLGYp>). The goal of this course is to make ML education available for everyone for free.

SUPERVISION:

- Alexander Lyzhov (moved to The Center on Long-Term Risk), Deep Neural Network Ensembles: Analysis and Approaches to Diversification (MSc, 2020)
- Andrei Atanov (PhD candidate at EPFL), Effective Learning of Deep Neural Networks Ensembles (BSc, 2018), Learning Deep Models with Small Data (MSc, 2020)
- Evgenii Nikishin (PhD candidate at Cornell), Stability Improvement and Knowledge Transfer in Deep Reinforcement Learning (MSc, 2019)

FRAMEWORKS & PROGRAMMING LANGUAGES:

- I'm fluent in Python and I use to code in C/C++, Go, language is not a problem after all.
- I'm also fluent with common Python libs such as NumPy, Matplotlib, scikit-learn, etc.
- My primary deep learning framework at the moment is PyTorch. Prior to that, I had a decent experience with Theano+Lagange and TensorFlow.
- I have experience with MapReduce, Hadoop, Hive, and Spark.
